VA01 - IMPACT OF MEDICINAL PLANTS ON SOCIETY

Hours: 40 Hrs

Course Objective: Utilization and economic importance of plants for Human Welfare.

Unit I: Medicinal Plants — Importance and Scope. Cultivation of medicinal plants — Processing and utilization. Chemical nature of crude drugs - Extraction, Preparation and preservation of crude drugs.

Unit II: Traditional herbal teas. Herbs for woman, Babies and children. Concepts of Herbal garden— Home, School Herbal gardens.

Unit III: Classification and Estimation of primary metabolites- Carbohydrates, fatty acids, aminoacids and Proteins. Secondary Metabolites - Classification , General characters Chemical nature, Estimation and Estimation methods for Glycosides, Tannins, Volatile oils, Resinous substances, Terpenoids Phenolic compounds and Alkaloids.

Unit IV: Antioxidants - Role of antioxidants - Estimation of antioxidants - Ascorbic acid, Tocopherol.

Unit V: Post-harvest technology in medicinal plants: scope and importance. Importance of herbal marketing -Future prospects and constraints of the herbal drug industry - Regulatory status of herbal medicine in India.

Estimation of Carbohydrates
Estimation of Proteins
Estimation of fatty acids
Estimation of Phenols
Estimation of Flavonoids
Preparation of crude extracts
Herbarium preparation
Estimation of Ascorbic acid and n — Tocopherol.

Course Outcomes (COs): After studying the paper , students are able to :

- Learn Herbarium preparing techniques.
- Understand the economically important plants of India.
- Characterize the utility of different plant groups.
- Develop the protocols for proper utilization and sustainable development of plants

VALUE ADDED COURSE (Impact of medicinal plants on society)

B. Sc (ZBC)

Students of B.Sc (ZBC) are hereby informed that value added course "Impact of medicinal plants on society" is scheduled from 2nd August 2022 to 26th August 2022 in your respective classroom.

Schedule:

- Time Slot: 03:00 PM to 05:00 PM
- Key Speaker: Dr Pulak Das
- Duration: 2 hrs

Program Overview:

The objective of this course is to develop knowledge and insights to various medicinal plants easily accessible to general population and their importance in daily life and industries.

Dr. Rajpal
(HOD)

WHAT IS VAC?

Value Added Courses are those that are designed to meet students' needs above and beyond the levels specified in the academic curriculum. Courses are included in the curriculum to improve students' employability. Value-added courses are taught by department faculty or by collaborating with the industry to bridge the gap between the curriculum and the needs of the industry.

Importance of Value Added Courses

The incorporation of value-added courses should concentrate on leveraging the talent and innovative capabilities of aspiring professionals to meet the needs of today's dynamic business environment, thus making the student more industry ready. The value-added programs supplement students' learning and prepare them for the challenges of professional life. These programs enable students to gain a more holistic perspective and thus a better understanding of current industry challenges, as well as to gain and develop innovative and creative skills through a diverse range of course offerings.

VA02: PHYTOCHEMISTRY AND BIOLOGICAL ACTIVITIES OF MEDICINAL PLANTS

Hours: 40 Hrs.

Course Objective: Learning and implementation of chemical extraction from plants and their utilization.

Unit I: Extraction – purification of bio-active compounds from plants - cold & hot extract extraction- Soxhlet extraction - crude extracts purification by various solvents.

Unit II: Isolation of bioactive compounds- chromatographic techniques - thin layer chromatography- liquid chromatography - HPLC and UPLC.

Unit III: Structural analysis of bioactive compounds - IR spectroscopy - Mass spectroscopy -NMR spectroscopy.

Unit IV: Herbal medicine - History of herbal medicine - differed types of herbal medicine - Ayurveda, Siddhi and Unani - Pharmacological action - clinical research and traditional uses of Indian medicinal plants - *Ficaria verna*, *Gymnema sylvestre*, *Ocimum sanctum*, *Curcuma longa*.

Unit V: Phytopharmaceuticals and their health benefits - anthocyanins, carotenoids, lycopene, isoflavones, polyphenols, omega 3 - fatty acids, biological effects of resveratrol.

Activity

1. Extraction of active ingredients from medicinal plants.
2. Demonstration of in vitro antioxidant activity of phytochemicals.

Course Outcomes (COs): After studying the paper, students are able to:

- Categorize the secondary compounds of plants
- Develop methodologies to extract chemical compounds
- Implement the skills for social benefits
